## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 9/20/2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the Rosenbeck reference has not been considered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) In claim 1 (and claims 2-14 by dependency), the clause "where k and 1, independently of one another, are 0 or 1", muddles the distinction between the number 1 and the (apparent) letter l. The same problem occurs in the line fifth from the end, wherein the number 1 appears to have been used instead of the letter l. The claim

Art Unit: 1713

should be amended using proper characters and fonts to clearly distinguish the difference between 1 and l.

(b) In claim 3, section ii) (and claims 4, 5 and 9-10 by dependency), the intended meaning of "manner known per se" cannot be determined.

(c) The intended scope of claims 6 (and claims 7-8 by dependency) are indefinite because the preamble recites "A process as claimed in claim 1" yet the parent claim is in fact a compound. Furthermore, there is insufficient antecedent basis in the claims for the limitation "the initiator."

(c) In claim 12, it cannot be determined whether the claim is a composition or a method.

(d) Claim 13 is indefinite because the scope of "conventional additive components" cannot be determined without some basis for determining the use, such as in a fuel composition, etc.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rath et al. (US 6,133,209).

Art Unit: 1713

Patented claim 8 including the first selection for Z describes the claimed compound except for the requirements of polydispersity and that the polyolefin be polyisobutylene. However, patented claim 1 includes polyisobutylene of the correct polydispersity and molecular weight among a short list of options. Therefore, one of ordinary skill in the art would be motivated to select the required polyisobutylene as the polyolefin in the end-functionalized polyolefin of claim 8 because such has been suggested among the range of polyolefins disclosed. Use of the functionalized polyolefin as a fuel and lubricant additive is the suggested application of the disclosed product (claims 14-19).

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1, 2 and 12-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S.

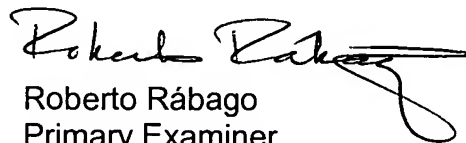

Art Unit: 1713

Patent No. 6,133,209. Although the conflicting claims are not identical, they are not patentably distinct from each other because common subject matter has been claimed as set forth in item 5 above.
